Your Software Solutions Partner

Your Solutions Partner

When you choose OuterLimits Technologies, you get a partner committed to improving the efficacy of your business. We roll up our sleeves, dig in, and ask the right questions to create the best possible solutions. We focus first to discover and analyze how your company systems operate and then create tailored
systems specifically designed
to create efficiencies.

We work tirelessly with your
team until every last detail of
your system and process
is perfect.

We connect the dots for you!

We Listen, Create & Deliver!

Our Process:

- Discover & Analyze

- Design

- Development and Testing

- Launch

About Us

OuterLimits Technologies, Inc. is a software development company focused on creating smarter, more effective solutions for our clients. Our professional staff of industry leaders and developers deliver solutions in the areas of custom software development, system integration and existing software improvement with a focus on optimizing client processes and procedures.

Founded by Chris Straw, OuterLimits Technologies has been providing software solutions to a diverse clientele since 2003. The company focus is simple; listen to the client and understand their needs, then provide the best possible solution using cutting edge technology. This personal approach allows OuterLimits to roll up their sleeves and become a valued partner in streamlining your company's processes and reducing expenses.

Whether it's building a complete system from scratch, integration, or creating custom apps, OuterLimits Technologies has a solution for you.
